

2 Circuits detection switch

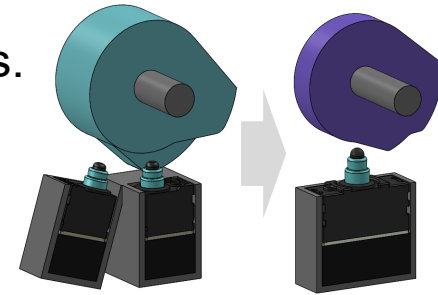

2 Steps detection type

2回路検知スイッチ

2段階検知型

■ Value 提供価値

- Only one switch has 2 circuits inside and it can detect 2 positions.
1つのスイッチで2段階位置検知が可能となりスイッチ員数削減が可能
- Space saving, material saving & work saving are available.
員数削減、設計自由度及び生産性向上に貢献（省スペース・省配線・省作業）

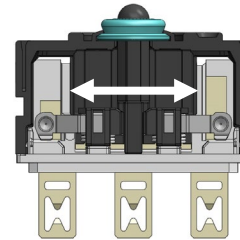

■ Unique technologies 独自技術

Panasonic Only

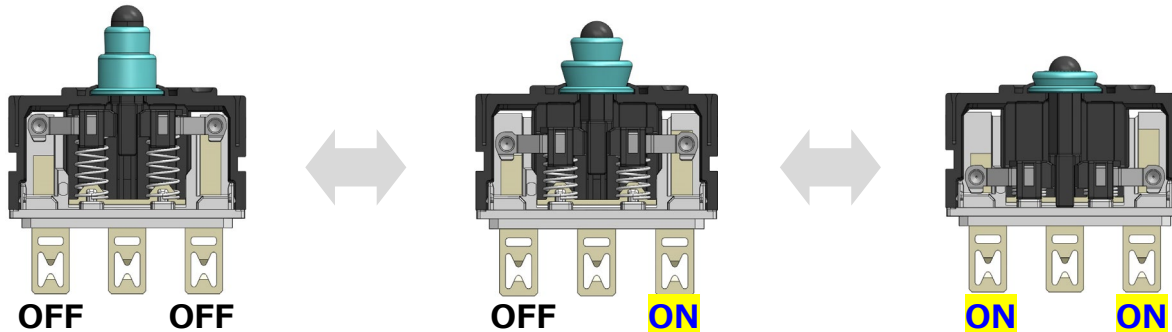

- Different length contact patterns on the left and right.
It makes possible to detect 2 positions.

左右長さの違う 接点パターン

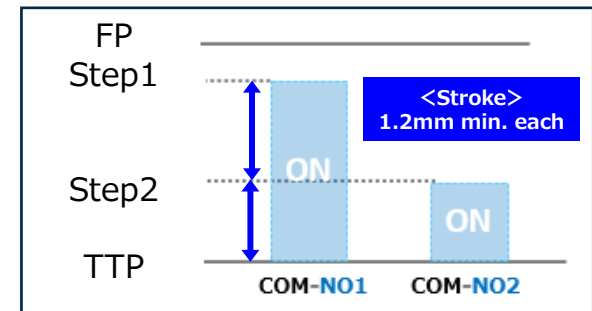

これにより2段階位置検知を可能にします

- One switch has 2steps detection with long stroke.
1つのスイッチで長ストロークの2段階位置検知を実現

<2 steps detection 2段階検知>

Applications 用途

- Food / Tail gate
- Side door / Slide door
- Flash handle
- Shift / Parking
- Lid of battery etc.
