### Recommended replacements

Adjustable range reflective photoelectric sensor  
EQ-500 series

Refer to 'Adjustable range reflective photoelectric sensor EQ-500 series catalog' for details.

## Advantages of switching to recommended replacements

### Stable sensing

The optical system has been advanced so that sensing is not easily affected by variations in color and angle.

### Complete installation interchangeability

Holes with the same size of mounting pitch ensure that the recommended replacement are fully interchangeable.

### Includes a BGS / FGS function

The DC voltage type in the **EQ-500** series of recommended replacements are equipped with a BGS / FGS function.

**BGS** (Background suppression): This is used when the objects being sensed and the background are separate from each other. This is useful when sensing objects on a conveyor line from the side of the conveyor. Not affected if the background color changes or someone passes behind the conveyor.

**FGS** (Foreground suppression): This is used when the objects being sensed and the background are close together. This is useful when sensing objects on a conveyor line from above the conveyor. If there is an object on the conveyor that has been set, sensing is not affected by the glossy, color or uneven in the object.

## Notes on using recommended replacements

Recommended replacements	Sensing performance	Specifications	Output circuit	Mounting dimensions	Dimensions	Enclosure color
<b>EQ-500 series</b>	◎	◎	◎	◎	◎	※

◎: Highly interchangeable  
※: Large differences

○: Almost no difference  
—: No corresponding item or model

- High degree of interchangeability in specifications, mounting dimensions and operability, so that replacement of the **MR3** series with the **EQ-500** series can be carried out smoothly.
- The sensors with a timer function in the **MR3** series are provided with ON-delay / OFF-delay / ONE SHOT timers, but the sensors with a timer function in the **EQ-500** series are only equipped with an ON-delay / OFF-delay timer.
- The sensor mounting bracket is not attached with **EQ-500** series.
- The recommended replacements have blind sectors.
